A SEASON TO BE THANKFUL

The Holiday season is the time of year that we celebrate family, friends, and relationships. We also give thanks for the many blessings that we may have enjoyed throughout the year. Thanksgiving and Christmas are an opportunity to reflect upon the positive things that may have occurred in your life over the course of the past year. That transcends family and friends when we reflect on the continued positive advancements of your union, Local 139. The very organization that you depend upon to assure your ability to continue to maintain a comfortable future for yourself and your family. At a time when the middle class continues to struggle for survival in our society, belonging to a strong, progressive union such as the Operating Engineers Local 139 provides you with the assurances you and your family needs to feel a sense of security that many in our society can only imagine. So, if you would allow me to submit to you some of the things that your officers and staff are thankful for within our organization, I would like to offer these items:

Terry McGowan
President/Business Manager
IUOE General Vice President

First, we would like to tell the members how grateful we are that they have continued to support our dedicated leadership as we continue to advance the interests of our membership through everyday challenges. We would also like to thank the membership for the strong sense of solidarity and pride displayed throughout our organization, that is something we all strive towards, and it is essential when we negotiate for higher wages.

We are thankful to see our membership enjoy great benefits for the hard work they put into our craft every morning they lace up their work boots. That includes a Cadillac healthcare plan as well as one of the best pension plans available in the United States. And when you factor in the pre-funded, family healthcare plan for your retirement, your monthly pension is enhanced immensely by the cost savings you realize on your monthly premium (self-pay), that you would otherwise have to spend out of your monthly pension check. These benefits assure our members and their families financial security throughout their careers and well beyond.

The future of our organization looks very bright as well, so that is another thing for us all to be thankful for. Our organizers have been working tirelessly to take advantage of the amount of work that is available now, and well into the foreseeable future thanks to the bipartisan infrastructure law that was passed early this year. These

organizers also work in a concerted effort with our business agents, who in turn identify non-union contractors trying to acquire work within the arena of our signatory contractors, which, in many cases results in a contract violation. These non-signatories have also found that they have a more serious problem right now. They find themselves ill-equipped to recruit and train young operators to meet the growing demand for our industry. But Local 139 has been prepared for this situation for quite some time.

That brings us to what we are most thankful for this holiday season: Our Skill Improvement and Apprenticeship Fund. Our staff at the Wisconsin Operating Engineers Training Center has been full throttle for the past several years when it comes to recruiting efforts. Whether it is our in-school Destinations Career Academy, community job fairs or high school career days, our training staff, along with some assistance from our business agents from the respective areas, has been on top of it. This year alone, we have recruited 445 apprentices, bringing the total of our apprenticeship to 839, all during full employment. With that foresight came the need for an expanded facility to train these new recruits. As many of us already know, the training program had to accommodate students in two rented Dayco trailers over the past few years to provide classroom space to meet the needs of enrollment, and they were still turning away 200 students a year. And, as our membership quickly approaches 11,000 members, this situation was about to get much worse. So, in August of this year, construction began on an approved expansion of our training center, because no member who is willing to dedicate the time to improve their skills, should be turned away.

In recent times, Local 139 has been recognized for having a world class training center and our members have been taking advantage of the opportunity. Well, it just got better, and it continues to grow with our membership, which assures a very bright future for our union, our membership and the opportunity to expand our market share. You see, non-union employers have a hard enough time trying to match our wages and benefits. But they will NEVER be able to match the infrastructure we have built to provide the industry with the recruits and the training required for them. That can only be achieved by being a part of the International Union of Operating Engineers Local 139. And for that, over this holiday season, we are most thankful for! Merry Christmas!
